

IBXS

Big Things Come in Small Packages.

Simply explain to your CO that you can't get there from here. He's reasonable; he'll even appreciate your candor. *Right.* Thanks to Wing's incredibly tough and easily transportable IBXS, you *can* get there from here. The IBXS is perfect for forging flood waters or covert ops— whatever you've gotten yourself into. Best of all, it's also designed to get you back out. Extra-durable polyurethane construction means higher abrasion and puncture resistance than Hypalon/CSM or PVC. Get in. Get out. Get Wing.

SPECIFICATIONS

	IBXS
LOA:	9' / 2.74 m
Beam:	4' / 1.22 m
