

SKI COLLAR™

The SkiCollar™ is an ultra durable inflatable tube that can be easily affixed to many PWC hulls to improve lateral stability, afford shock absorption and provide additional flotation. It installs quickly to the craft without hardware or tools, greatly improving PWC stability without sacrificing exhilarating speed and tight turning capabilities. Applications range from rescue/patrol, protection for rental units, or simply training wheels for novice riders.

- *Improves lateral stability*
- *Affords shock absorption*
- *Provides additional flotation*
- *Lightweight — does not impede performance*
- *Easy to install on many PWCs (Yamaha FX, SeaDoo RXP, etc.)*
